DETAILED ACTION

Status of Application, Amendments and/or Claims

The amendment of 18 January 2005 has been entered in full. Claims 3, 4, 9, 10, 12, 14, 15, and 17 are amended.

Claims 1-18 are pending.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a novel polypeptide derived from a Notch protein.

Groups II-XIX, claim(s) 6-11, drawn to one of the polypeptides recited in claim 6 (SEQ ID NOs: 1-18).

Group XX, claim(s) 12-14, drawn to an antibody that can recognize a polypeptide derived from a Notch protein.

Group XXI, claim(s) 15-18, drawn to a gene encoding a polypeptide derived from a Notch protein, a vector, and transformant.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

This PCT rule defines special technical features as technical features that identify a contribution which each of the claimed inventions, considered as a whole, makes over prior art. Claim 1 is anticipated by prior art. Okochi et al. (EMBO J 21(20): 5408-5416, 2002) teach novel polypeptides (N-terminal Notch-1 A β -like fragments) derived from a Notch protein (abstract; page 5409, bottom of column 1 through top of column 2; page 5411, Table I). Therefore, claim 1 lacks a special technical feature and cannot share one with the other claims.

Art Unit: 1647

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
